Visual impairment, also known as vision impairment or vision loss, is a decreased ability to see to a degree that causes problems not fixable by usual means, such as glasses. Some also include those who have a decreased ability to see because they do not have access to glasses or contact lenses. Visual impairment is often defined as a best corrected visual acuity of worse than either 20/40 or ...

The preferred staining procedure is the fluorochrome method. Specimens should be cultured on both liquid and solid media. Species that require special growth conditions and/or lower incubation temperatures include *M. haemophilum*, *M. genavense*, and *M. conspicuum*. These species can cause cutaneous and lymph node disease.
