Telecommunication - Wikipedia

Fri, 21 Sep 2018 08:56:00 GMT

Etymology. The word telecommunication is a compound of the Greek prefix tele (τηλε), meaning distant, far off, or afar, and the Latin communicare, meaning to share. Its modern use is adapted from the French, because its written use was recorded in 1904 by the French engineer and novelist Édouard Estaunié. Communication was first used as an English word in the late 14th century.

Wireless - Wikipedia

Thu, 20 Sep 2018 02:09:00 GMT

Wireless communication, or sometimes simply wireless, is the transfer of information or power between two or more points that are not connected by an electrical conductor. The most common wireless technologies use radio waves. With radio waves distances can be short, such as a few meters for Bluetooth or as far as millions of kilometers for deep-space radio communications.
